

UNION

UNION Syntax

```
SELECT ...  
UNION [ALL | DISTINCT] SELECT ...  
[UNION [ALL | DISTINCT] SELECT ...]
```

Performing a UNION:

```
mysql> SELECT select_expr FROM tbl_name WHERE  
where_condition UNION SELECT select_expr FROM  
tbl_name WHERE where_condition;
```

Using UNION with ORDER BY:

```
mysql> SELECT select_expr FROM tbl_name UNION  
SELECT select_expr FROM tbl_name ORDER BY col_name;
```

Using additional columns for sorting results:

```
mysql> SELECT 1, select_expr FROM tbl_name UNION  
SELECT 2, select_expr FROM tbl_name ORDER BY  
col_name;
```
