Triggers

CREATE TRIGGER Syntax

```
CREATE
    TRIGGER trigger_name
    trigger_time trigger_event
    ON tbl_name FOR EACH ROW
    [trigger_order]
    trigger_body]
```

About Triggers

- Triggers activate whenever a statement inserts, updates, or deletes rows in an associated table. These are known as trigger events.

- Triggers can be set to activate before or after a trigger event occurs.

- Triggers are not permitted on views.

Create Trigger:
```
mysql> CREATE TRIGGER trigger_name trigger_time
trigger_event ON tbl_name FOR EACH ROW
trigger_body;
```

Show Triggers:
```
mysql> SHOW TRIGGERS [FROM db_name];
```

Drop Trigger:
```
mysql> DROP TRIGGER [db_name.]trigger_name;
```
